300 Feet Eco Solutions

Co Founder

November 2012 - February 2015 (2 years 4 months)

300 Feet Eco Solutions is a Waste Management Solutions Company. We provide Innovative Waste Management Solutions to corporate spaces, commercial centres, and large event spaces. We have extensive experience in managing waste at large events such as concerts and conferences.

300 Feet Eco Solutions is also actively involved on the social front in an effort to set up a systematic waste collection mechanism on the streets of Bangalore. One of our first projects was the setting up of 40 litter-bins in the Jayanagar 4th Block Shopping district to better aid the civic agencies in their waste collection efforts. We have since tied up with the Jayanagar MLA's office and are working towards systematically transforming the waste collection and disposal in the entire Jayanagar Constituency. We are also working to tie up with Corporate Companies and other agencies to widen the net of systematic waste management in the city.
