## Expérience

BlueLife AI

Co-Founder & CEO

janvier 2018 - Present (2 ans 8 mois)

London, United Kingdom

Hadelin is the co-founder and CEO at BlueLife AI, which offers two services for businesses to take advantage of Artificial Intelligence, either by learning it or using it directly. These two services are:

Online & Onsite Corporate Trainings: Some companies prefer to train their team in AI with a training that is fully customized to the domain knowledge of their business. That's exactly what we offer as a first service: Either onsite or online, we train teams of employees for a couple of days with a fully customized training on Artificial Intelligence or other Data Science & BI tools like Microsoft Power BI, Tableau, advanced Excel, RPA and AWS, which are more and more used and needed by companies today.

Consulting Services: Some companies don't have time to train their teams in Artificial Intelligence and prefer to outsource the implementation of AI solutions rather than learning how to build them internally. That's what we provide as a second service: We build fully customized AI solutions that answer a certain need of a business, like for example improving customer service with a chatbot, automating their repetitive tasks with RPA, optimizing their process with AI, maximizing their profit thanks to predictive analysis, etc. Consulting Services are a good solution for companies that want to leverage AI as soon as possible in order to stay ahead of the competition.

## Udemy

### Bestselling Author

janvier 2018 - Present (2 ans 8 mois)

Dubai, United Arab Emirates

Author of 50+ online courses on new technologies, including Machine Learning, Deep Learning, NLP, Reinforcement Learning, Artificial Intelligence, ChatBots, Blockchain and more, which have done 1M+ sales in 210 countries.
